

SuperTRAP® Sediment Filters

Removal of Sediment and Suspended Solids

- Clears Your Water by Removing Sediment and Suspended Solids
- High Efficiency, Long Life, and All Natural Media
- Efficient Metered Automatic Filter System
- Environment and Natural Resource Friendly

SuperTRAP®

by CASCADIAN.

Made In The U.S.A.

What *SuperTRAP®* Does

SuperTRAP® automatic filters remove large amounts of suspended solids, down to 5 micron, from your water leaving clean clear refreshing water. Protects all downstream plumbing, fixtures, and appliances.

How it Works

SuperTRAP® is a proven all natural zeolite with superior filtration properties. *SuperTRAP®* features an unparalleled high capacity for trapping suspended solids. A simple backwash is all that is needed to keep the *SuperTRAP®* filter working for many years.

Eco-Friendly

With *SuperTRAP®* your problems are solved with the most Eco-Friendly filter available. *SuperTRAP®* saves water by regenerating with a simple backwash only as needed. Your water is simply clean and refreshing from every tap.

58X Advanced Automatic Control Valve

- Advanced solid state microprocessor-base smart controller with built in diagnostics
- Intuitive Touch Screen Programming
- Efficient meter initiated regeneration saves water by backwashing only when needed.
- Time tested balanced construction with non-corrosive materials
- Handles high flow rates to 27 GPM
- No memory loss on power out
- Vacation mode

SuperTRAP® Sediment Filters

The Media

SuperTRAP® is a natural zeolite media with superior filtration properties. Filters particles down to 5 micron (5 one millionths of a meter) resulting in clean clear refreshing water. *SuperTRAP*® features an unparalleled high capacity for trapping suspended solids reducing the frequency of backwashes and water wasted to drain. A simple backwash is all that is needed to keep the *SuperTRAP*® filter working for many years.

The Tank

Made of durable high strength non-corrosive materials for a long dependable life.

The Control Valve

Made of rugged non-corrosive Noryl™ the high flow rate design does not restrict water or drop household water pressure. Compact size minimizes space required for installation.

The Control Electronics

Intuitive touchscreen display and sophisticated on-board electronics combined with pass-through optical positioning, integrated water meter and fully customizable programming creates the most dependable, efficient and effective filter available.

Valuable on-board system information includes:

Available information includes:

- Instant and peak flow rates
- Daily Water Usage
- Gallons used since last reset
- Total gallons treated

The Company

Since 1994 O₃ Water Systems (a family owned business) has been innovating, designing and manufacturing professional grade water treatment solutions including CASCADIAN® Automatic Solutions™ and Integrated Cartridge Solutions™ that are now found around the world.
